

**Jukebox ONE MORE TIME CD –
a real treat
for the eyes and ears**

Chrome and glitter, rotating light columns with magically changing colours. A fascinating spectacle of light and sound. That is the ONE MORE TIME (short form OMT) CD.

Today's life-style has rediscovered the nostalgic charm of the forties and fifties. The beloved design of those days with chrome and glitter is a welcome change to the priority of functional and abstract features which dominate nowadays. The One More Time CD combines both.

The faithful reproduction of an authentic 1946 design is the ideal casing for the sophisticated CD changer. Now the music of Glenn Miller sounds in pure CD quality. But not just Glenn Miller, the One More Time CD plays more than 1200 hits and evergreens in superb laser sound quality.

The ONE MORE TIME CD - the exceptional way to listen to music.

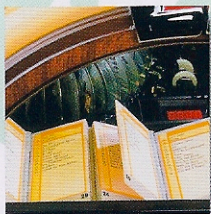

The rotating lights with their constantly changing colours and the endless rising bubbles offer a fascinating spectacle.

Option: Infrared remote control

Option: Microphone kit

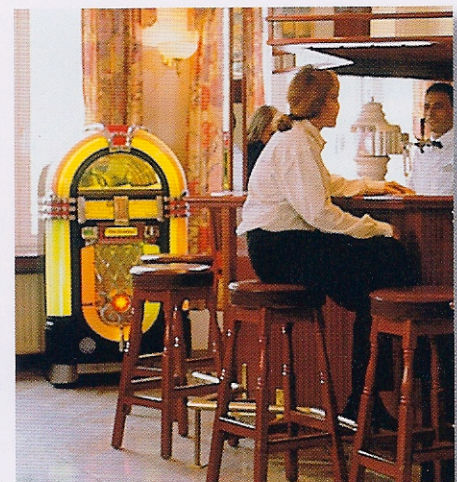

More than 1200 songs are shown on max. 60 title cards. These pages are turned automatically at the touch of a button and give full view of 6 CDs at the same time.

ONE MORE TIME CD

No matter where the OMT CD is located, whether it is the entrance hall of a company, a restaurant, a bar or a living room - this nostalgic jukebox will always be the optical and acoustical eye catcher.

The OMT CD is characteristic for its special exclusivity and individuality.
