THE FUTURE IS CASHLESS...

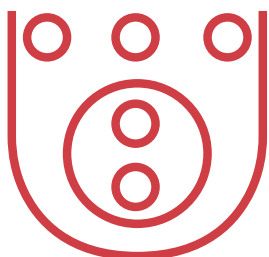

PINBALL MACHINE - CONTACTLESS PAYMENT OPTION

Pinball has seen a massive resurgence over the last few years, both for home customers and commercial use. Market-leading manufacturer, Stern, releases 2-4 new titles a year including the incredibly popular Avengers, Jurassic Park, and Mandalorian licenses.

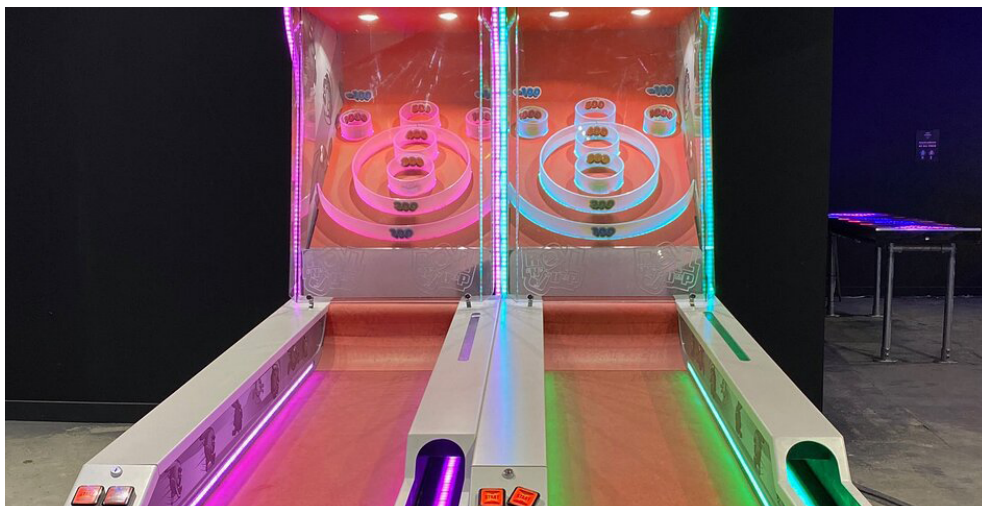

With a cult-like following, the machines take insane amounts of money. We can also offer these with contactless payment options.

SKEEBALL

The insanely popular US game has recently launched in the UK. Skee-ball is easy to grasp but difficult to master. Designed for 1-4 players and for multiple machines to be lined up and connected.

This can be played for fun or offer redeemable prizes or drinks tickets for high scores.

TABLE TENNIS TABLES

Table tennis is hugely popular with all age groups and is a staple in many pubs and bars up and down the country. Our top recommended table is the Cornilleau Proline 510m.

This is a tank of a table and can withstand an unbelievable amount of punishment while looking and playing great.

PERFORMANCE

The products are a mixture of pay-to-play and free-to-play options. Having a healthy mix of machine revenue offers great value to customers while increasing dwell time and F&B sales.
